

ACCELERATE

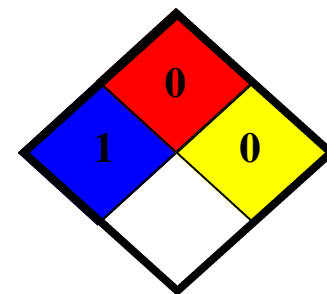

LIQUID DE-ICING SOLUTION

- EXCELLENT ANTI-ICER AND DEICER
- NON-STAINING
- NON-TRACKING
- CLEAR LIQUID

General Use Directions

Rates will vary according to temperature

Weight: < 9.5 pounds per gallon

DOT # NON-HAZARDOUS

KEEP OUT OF REACH OF CHILDREN
CATUION: HARMFUL IF SWALLOWED

If swallowed, give water and call a physician. If in eyes, flush with large amounts of water for at least 15 minutes. Get medical attention if irritation persists. Impervious gloves are recommended when handling the solution. If mist is present, safety glasses with side shields should be used. A respirator is recommended if there is a presence of high vapor or mist concentrate when working outside sprayer.

PRECAUTION: Accelerate® will not cause harm to properly mixed (air entrained), poured, finished and dried concrete. Do not use on concrete less than 1 year old. Accelerate® will not chemically attack concrete; however, natural freeze thaw cycles (as well as freeze thaw cycles caused by deicing material) can cause damage to poor quality concrete. This product should not be used on precast concrete steps, precast masonry walks or steps, brick, exposed aggregate or on any questionable quality concrete. This product should not be over-applied. Excessive amounts may cause surface flaking or scaling and increase the occurrence of freeze/thaw cycles. It is recommended to remove all water and slush resulting from the deicing process as removal will decrease the frequency of freeze thaw cycles. Also, all deicing materials can cause damage to plants, vegetation and lawns when it is place directly on, or very near, the vegetation itself. Vegetation damage is also more likely when deicing products are over-applied.
